Lawless is DEAD

Yeah, that’s right ladies and gentlemen, Lawless is officially dead. ROBLOX finally put the nail in the coffin and wants us to pay a subscription just to keep Lawless up for all ages! We’re most likely never going to release another chapter on ROBLOX if they don’t remove this feature. Hey don’t give your hopes up though, Lawless WILL be worked on still… just on a different engine. Bummer… But even if that's the case we’ll still try our best to put out a game with formidable quality. In the meantime we are still deciding which game engine we’re gonna use. On the website we’ll put which options we have and put which one we are leaning towards. Thanks for all the support on ROBLOX and we’ll promise to push out another game as soon as possible.
